A2. README

This folder contains all algorithms and subroutines that make up *Nemo*. The file named *extract_all_objects* is the Matlab file that incorporates all commands of our system. The Graphical User Interface is loaded by typing 'nemo' at the Matlab prompt. All files contained here should be placed in the same directory. In order to run the routines, the correct path should be defined in the nemo.m file (**change paths in lines 53 and 185 of the file**).
